We believe that you build knowledge through meaningful interactions rather than acquiring facts. We've developed our program around this theory and we teach you how to incorporate this principle into your own teaching practice. Major elements of our program include field experiences within schools and classrooms, in-class discussions, individual unit/lesson planning and assessment development. We emphasize the use of technology in the classroom and model the use of Smartboards, presentation software, digital data projectors and more. Our faculty have years of experience in classrooms and in administrative roles in school districts throughout the U.S. Our program is accredited by the North Central Association of Colleges and Schools. The teacher education programs are approved by the Missouri State Board of Education.
