 - ◆ NU 460
 - ◆ NU 410

Missouri Valley College's Bachelor of Science in Nursing (BSN) prepares nurses through education and clinical experience to provide safe, evidence-based, and compassionate care to complex patients in diverse settings. Some of the clinical experiences include local community hospitals, tertiary care centers and other community health centers/agencies. Completion of the BSN program does not guarantee licensure or eligibility to sit for the NCLEX licensure examination. Students will need to review the board of nursing regulations regarding the eligibility to sit for the examination prior to the testing date.

Career/Employment Possibilities

- Hospitals
- Outpatient Clinics
- Research Institutions
- Home Health
- High Schools, Colleges & Universities
- Government Institutions

Graduate Programs/Career Advancement Possibilities

- Graduate School
- Post Graduate School
- Doctorate Programs

Why a degree in Nursing from Missouri Valley?

Valley's liberal arts foundation benefits nursing students by fostering critical thinking and lifelong learning skills that are necessary for clinical practice. Our nursing program is a 2+2 program consisting of two years of core and prerequisite courses, and two years of nursing courses and clinical experiences. As a nursing student at Missouri Valley you'll gain experience in a variety of clinical settings, including local community hospitals, tertiary care centers, and other community health centers and agencies. The MVC nursing program follows standards and guidelines set forth by the Missouri State Board of Nursing and the Commission on Collegiate Nursing Education. The nursing program has been granted full approval by the [Missouri State Board of Nursing](#). "The baccalaureate degree program in nursing at Missouri Valley College is accredited by the [Commission on Collegiate Nursing Education](#).
